

April 25, 1947.

Mr. Manfred Bowditch, Field Director,
The Saranac Laboratory of the
Edward L. Trudeau Foundation,
Saranac Lake, N. Y.

Dear Mr. Bowditch:

In reference to yours of April 22, I have been delayed in responding to your earlier communication of March 18 on account of extreme pressure at this season in my schedule. In fact I have thus far been able to give but superficial attention to Gardner's material and I am forced to delay a while longer on account of various continuing pressures through May.

Referring to your March 18 letter, I had already read the article by King and Clegg published in INDUSTRIAL HYGIENE DIGEST of February, 1947, and have a copy of it.

Perhaps you had better delay consideration of my participation in the September 29 Symposium until it is clearer that I could properly do so. If your program must be made before that is determined, probably I had better be left out, particularly since that conflicts with our opening here anyhow.

Hoping that I may be able to give some more definite expression about my prospects and with best regards, I am

Sincerely yours,

Kenneth M. Lynch, M. D.,
Dean.

KML:kbp.

P. S. - I help raise Francis (Ravenel) Shipman, although I cannot claim to know Tom more than very pleasantly. Please give them my best regards.

KML.
