Edward M. Kline, M.D.
Medical Consultant
General Electric Company
Lamp Department
Weta Park
Cleveland 12, Ohio

Dear Ed:

We are in the process of preparing the report of our progress concerning the silica fume study. It should be completed in the very near future. In view of this, it might be well for you to delay your trip to Saranac Lake at least until you have had the opportunity to review that report. Then it would be profitable for us to get together to discuss the future course which we might pursue in our studies here.

With every good wish to you.

Sincerely

Arthur J. Vorwald, M.D.
Director
