Q The melena?
A Blood in the stool.
Q And the last word, hematochezia?
A That is a blood in the stool, also.
Q So back in April 23rd of 1981 he had no significant abdominal pain; is that what this record indicates?
A That is what Dr. Heyman's recollection is, yes.
Q Do you have the August 3rd, 1981, medical records in front of you there, Doctor?
Did you review those?
A Are you talking about Dr. Heyman's letter?
Q No, the Johns Hopkins Hospital. You talked about it for a little bit in front of the jury.
Were you shown those records?
A What date again?
Q August 3rd, 1981. That is when, I believe, they took 12 pounds of fluid from him.
A I don't have that.
Q All right.
