5) Consider relocating point of entry of makeup air - any dust that is not collected could be kept continually in motion by air sweeping up from the floor level;

JWP: COMMENTS: DEFLECTOR TO BE INSTALLED 12/22/72.

6) Cleanup after day's operation or periodically throughout the day while dust controls are being improved upon;

JWP: COMMENTS: STANDARD PRACTICE AFTER EACH JOB.

7) Place plastic bag in disposal container - wet down waste pieces occasionally - when disposing of material, close top to prevent release of dust; and

JWP: COMMENTS: PROVIDE WETTING FACILITIES AND COVER FOR CONTAINER.

8) Continue to require use of respirators on all jobs where asbestos materials are used, i.e., rip-out of old material, insulating, and fabricating (Rip-out requires use of air-supplied respirator.)

JWP: COMMENTS: ALL INSULATORS SUPPLIED WITH THEIR PERSONAL RESPIRATOR.
