

February 25, 1927.

Dr. Graham Edgar
320 Yonkers Street,
Yonkers, N. Y.

My dear Doctor Edgar:

I am sending you by separate cover a report of our animal experimentation in so far as it bears on the particular problems of the hazards related to the handling of Ethyl Gasoline. It may be that you already have a copy of this, since the report was multigraphed in New York. If you wish other copies you can obtain them from the New York office, or I will be glad to send you any others from this office.

I have just gotten back to work this week after having spent ten days in the hospital. I was sufficiently uncomfortable during my last visit to the east so that I decided not to endure it any longer, I therefore took a holiday and had my difficulty extricated. I am feeling very much better already and expect from this time on to be able to both work and amuse myself much more satisfactorily.

Please give my very kindest regards to Mrs. Edgar. It was certainly pleasant indeed to have an opportunity to spend an evening with both of you, and I remember it as one of the most pleasant evenings that I spent on my recent trip to your city. I shall hope to see you again soon.

Sincerely,

RAK:OJD
