29th September, 1961.

Dr. J. McNulty  
Chest Physician  
District Hospital  
KALGOORLIE W.A.

Dear Dr. McNulty,

Thank you for your letter of the 18th of September which I was very pleased to receive.

The additional information that you have given concerning the dust counts are very interesting and certainly do not reflect any improvement during the working period of the new machinery. Your comments concerning this may be the answer.

I am quite satisfied that the Company will take action when we produce the facts for them to study. At the moment I am reading all the articles I can get hold of and have discussed the matter with Dr. Gordon Smith of the School of Public Health at the University of Sydney. He is both interested and helpful.

I shall let you know what progress we make in the near future with kind regards and again many thanks for your helpful letter.

Yours sincerely,

H. MAYNARD RENNIE
