Washington, DC 20037

Dear Robert:

Reference is made to your correspondence dated December 17, 1981 concerning final payment to Dr. Maltoni for the EDC research. We have made an honest effort to gather more data on a number of points in Dr. Maltoni's EDC program. It is still not clear how the chamber concentrations varied within each day. Were the individual readings averaged each day and then the monthly averages calculated? It would be interesting to see what were the maximum concentration ranges per day, however, I doubt if this is worth the effort. We probably have received as much information from Maltoni as we are likely to get so I recommend we make the final payment.

Sincerely,

Zeb G. Bell, Jr.
