Dr. J. P. Needard

Dear Sirs:

In reply to your letter of September 1, we have only one spare copy of the asbestos manuscript pending its publication. We are sending this to you for your personal use to pass around to the interested companies.

As you will appreciate, the reproduction of sixteen copies with the twenty-three photographs and nineteen tables would be a herculean task, time consuming and costly. We have only one photograph and the reproduction of the photographs alone would take considerable time.

Is it not possible to wait until the paper is published, at which time a number of reprints will be available? Just as soon as we receive some information from the Editor of Archives of Industrial Hygiene and Occupational Medicine, we will advise you.

Sincerely yours,

J. P. Needard
