26 RESPONSE TO INTERROGATORY NO.31:

27 Attached as Exhibit 2 is a list of the asbestos-containing
28 products manufactured and sold by Congoleum,

1 including the names and dates of production for each such
2 product. The products listed on Exhibit 2 include asphalt
3 and vinyl asbestos tile; inlaid vinyl sheet goods; cushioned
4 inlaid vinyl sheet goods; homogeneous vinyl sheet goods;
5 chemically embossed cushioned vinyl flooring; and vinyl sheet
6 flooring.

7 The exact chemical composition and specifications of
8 these products are proprietary information and trade secrets
9 of the company, and, further, cannot be determined at this
10 time based on existing records. However, the general formula
11 mix used in manufacturing the flooring products is set forth
12 below.

13 Asphalt and vinyl asbestos tile products were of a
14 uniform composition through the entire thickness of the
15 flooring product. Vinyl asbestos tile products were manufac-
16 tured by combining vinyl resins, plastisizers, fillers,
17 binders, pigments and asbestos. The mixture was formed into
18 a sheet and cut into tiles. Asphalt tile products were
19 manufactured by combining binders, fillers, pigments,
20 asphalt, and asbestos.

21 Inlaid vinyl sheet goods consisted of vinyl design and
22 wear layer on a support web of felt sheet. The design and
23 wear layer was manufactured by mixing together, through a
24 trade secret process, vinyl resins, plastisizers, pigments,
25 binders and fillers. The support sheet was manufactured by
26 combining asbestos, filler, and binders.

27 Cushioned inlaid vinyl sheet goods were manufactured in
28 a fashion similar to inlaid vinyl sheet goods, except for the

1 addition of a foam cushion layer. The design and wear layer
2 and foam cushion layer did not contain asbestos. The support
3 sheet was manufactured as set forth above.

4 Homogeneous vinyl sheet goods were of uniform com-
5 position manufactured by mixing together, through a trade
6 secret process, vinyl resins, plastisizers, pigments, fillers
7 and asbestos. Homogeneous vinyl goods also used a backing
8 similar to the backing used for inlaid vinyl sheet goods.

9 Chemically embossed vinyl sheet goods contained 4
10 layers: a backing or support sheet, a foam cushion layer, a
11 design layer and a clear wear layer. The support sheet was
12 manufactured as set forth above, the other layers did not
13 contain asbestos.

14 Vinyl sheet flooring contained 3 layers: a backing or
15 support sheet, a design layer and a clear wear layer. The
16 support sheet was manufactured as set forth above. The other
17 layers did not contain asbestos.

18 Vinyl asbestos tile products were manufactured at
19 Kearny, New Jersey; inlaid vinyl sheets goods were manufac-
20 tured in Wilmington, Delaware and Trenton, New Jersey; other
21 vinyl sheet goods were manufactured in Trenton, New Jersey,
22 and Marcus Hook, Pennsylvania; and the backing or support
23 sheets were manufactured in Finksburg, Maryland. Congoleum
24 also sold the backing used for vinyl sheet goods.

25 A description of the physical appearance of the asbes-
26 tos-containing flooring products may be found in Congoleum's
27 pattern books which may be copied upon request and at
28 Plaintiff's expense. The asbestos containing flooring

1 products were intended for use as residential and commercial
2 flooring.

3 Chrysotile asbestos was the only type of asbestos used
4 in the asbestos-containing flooring products. The asbestos
5 for those flooring products was provided by the following
6 companies:

7 Johns-Manville Corporation
8 Carey Canada, Inc.
9 Lac D'Amiante Du Quebec (Lake Asbestos)
National Gypsum Company
Nicolet, Inc.
United Asbestos, Inc.

10 Congoleum is unaware of any of its products being on the
11 United States Government's "Qualified Products List."

12 Exhibit 3 lists the distributors to whom Congoleum sold
13 its flooring products in the GEOGRAPHIC AREA, including
14 applicable dates. Congoleum cannot identify particular
15 products, or amounts thereof, sold to particular
16 distributors. Congoleum did not sell its flooring products
17 to any companies in the GEOGRAPHIC AREA other than the
18 distributors listed on Exhibit 3.

19 In addition to flooring products, Congoleum developed an
20 asbestos-containing wall-covering named "Firechek." However,
21 Congoleum sold only two rolls of this product to a
22 distributor in New York, New York.

23 The documents evidencing the information sought in these
24 interrogatories are available for reproduction upon request
25 and at the requesting party's expense.

9 RESPONSE TO INTERROGATORY NO.37:

10 Congoleum provided warnings to its distributors, placed
11 warnings within the packaging of its flooring products and
12 also distributed warnings through field installation
13 seminars. The warnings stated substantially as follows:

14 Warning issued in 1975: Warning. Some resilient floor
15 covering and most felt backings contain asbestos fibers.
16 When removing or covering over such floor covering, under no
17 circumstances should it be sanded. Such sanding of asbestos-
18 containing material can place fine particles of asbestos in
19 the air which could cause serious bodily harm.

20 Warning issued in 1985: Warning. Do not sand existing
21 resilient flooring, backing or lining felt. These products
22 may contain asbestos fibers that are not readily
23 identifiable. Sanding of asbestos-containing material can
24 place fine particles of asbestos in the air. These asbestos
25 particles if inhaled may cause serious bodily harm.

26 Copies of the warnings set forth will be provided upon
27 request and at the requesting party's expense. The persons
28 most knowledgeable regarding warnings are Robert Aspy and

Michael Pomianoski.
