F.Y.I., I have convinced the Cousteau Society (as in Jacques Cousteau) that there really isn't much to see at our PCB manufacturing unit so they won't be coming to St. Louis to film our facility after all.

They are proceeding with production on a 30-minute documentary for PBS on PCBs and the Hudson River. I have supplied them with our position paper and the January news release which paraphrases Mr. Fitzgerald's remarks to the EPA.

They have indicated that this information will be very helpful to them and expressed their appreciation for Monsanto's "extraordinary" cooperation.
