Tooling Purchase Order Attachment

Description of tooling to be purchased:

Preform molds, curing molds, backup plates, stripper change pieces, marking fixture, proof test fixture and gages required to produce part X 10289301, inner shoe and lining assembly.

The above tooling has a capacity of 4,000 pieces per 24 hours on a straight time basis.

The expected life of this tooling is 3,000,000 pieces.

Any expense incurred for replacement tooling will be borne by Seller.

Tooling on this purchase order becomes payable upon acceptance and compliance by Seller of the following conditions unless specifically waived by Buyer:

1. Seller to stamp or otherwise permanently identify Kelsey-Hayes tooling.
2. Tools subject to inspection at any reasonable time, at the plant of Seller or plants of subcontractors of Seller by Representative of Buyer.
3. Seller to furnish Buyer with reproducible copy of the tool design drawing.
4. Initial sample approval of production pieces from production tooling.

The foregoing conditions and statements supplement the Terms and Conditions, specifically number 11 regarding special tooling, appearing on the reverse side of the attached Purchase Order.
