Mr. Gordon Gainer
Research & Development Center
Westinghouse Electric Corporation
Pittsburgh, Pennsylvania 15235

Dear Mr. Gainer:

Enclosed are copies of letters addressed to our customers informing them of the polychlorinated biphenyl problem and the action Monsanto is taking in response to it. I believe the appropriate purchasing representatives within Westinghouse have received copies of these letters.

I have also included for your information copies of Monsanto's position regarding the markets it will supply with Aroclor, summaries of biodegration and toxicity studies and copies of pertinent articles that have appeared recently in scientific journals.

I hope you find this information useful to you. I regret the cost and inconvenience the withdrawal of Aroclor 4465 will impose upon you and I am hopeful that the alternate product proposed will prove satisfactory for your application.

If I can be of further service, please let me know.

Sincerely,

William B. Papageorge
Manager
Environmental Control
