Subject: Request for Change in Sampling
and Analytical Program Under
Part 61, NESHAPS Regulation for
Vinyl Chloride Monomer Control

Ref: Letter to Mr. H. Houston (TACB -
Austin, Compliance) from Mr.
J. F. Erdmann Dated 21 Jan. 1980

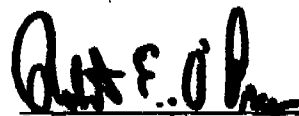

Gentlemen:

Attached is a copy of the Texas Air Control Board (TACB) written response to the referred letter. As indicated in their letter, upon completion of their review of our request, their recommendation will be forwarded to the Environmental Protection Agency for final evaluation.

As soon as I am made aware of the TACB's recommendation, such information will be forwarded to you.

If you need additional information, please let me know.

Yours very truly,

Robert E. O'Bryan

Re: TACB Account No. GB-0076-J

Dear Mr. Erdmann:

This is to acknowledge receipt of your January 21, 1980 letter wherein you request approval of an alternate method of testing for VCM content of your polyvinyl chloride resins. I have forwarded your request to our Source Evaluation Section for review. Upon completion of that review your request will be forwarded, with our recommendation, to the U. S. Environmental Protection Agency's (EPA) Regional Office in Dallas.

As you know, the Texas Air Control Board is not authorized to approve alternate test methods under NESHAPS; all such approvals must come from EPA. If you have any questions, please contact James Draper or Jerry Demo of our Source Evaluation Section. Thank you for your cooperation.

Sincerely,

A handwritten signature in cursive script, appearing to read "Howard E. Houston".
