Dear Dr. Kehoe:

Thank you for the permission to use your data.

Your point about the heading is well, and appreciatively, taken. If it were possible we would change the title, but unfortunately the printer won't let us at this stage. Taken literally, there is no such thing as a "normal" exposure to lead or any other toxic substance, which I take it is an element in your objection. "Usual" or "allowable" would be better. We will mark this for correction in the next edition. Thanks for bringing it up.

Sincerely yours,

Philip E. Sartwell, M.D.
Professor of Epidemiology
