Charles City, Iowa

Dear Doctor:

Your letter of September 12 was received in this Office on September 25, and because of the fact that we not have Tetraethyl lead in the field, we are referring your letter to the Ethyl Corporation Research Laboratory at 1600 W. 8 Mile Road, Ferndale 20, Detroit, Michigan.

We believe the Ethyl Gasoline people will write you in a very short time or have one of their field representatives contact you.

So far as Tetraethyl lead fluid is concerned, this product is purchased by us from the Ethyl Corporation in tank car lots for delivery only at Refineries, and certain restrictions laid down by the manufacturer preclude any stock of this material from being carried in the Field.

Yours truly,

L. B. KELLY, MANAGER

Standard Oil Company of Indiana

Gentlemen,

I need a small amount of Tetraethyl lead for some work I want to conduct-
as user of Standard of Ind. for years I want to find out if I can get it from
you or have to contact the Ethyl Corporation of America.

If you cannot furnish the material please give me the address of
the Ethyl Corporation .I need about the equivalent of 300 cc-

sincerely yours

W. P. Pelz, M.D.
