The attached draft of our preparedness Q&A information, prepared with the assistance of Mr. Papageorge, on PCBs is submitted for your comments.

This material was originally prepared in anticipation of an upcoming EPA press conference but is now more timely and indeed critical in view of the recent publicity in the St. Louis Post-Dispatch and the New York Times.

With this in mind, please let me have your input as soon as possible so we can be prepared for the additional queries that are sure to come.

Thanks.
