Aroclor-Toxicity

TELEPHONE REPORT

Spoke to: Mr. Hope

Company: Shellmax BP

Date: 6th April, 1964

Subject: Hydraulic Fluid - Toxicity

c.c. J.M. Campbell
Dr. D.V.N. Hardy
R.G. Birrell

To-day I received a telephone call from Mr. Hope of Shellmax BP and in the absence of Mr. Birrell, I passed the call over to Dr. D.V.N. Hardy.

Apparently Shellmax BP use at least 3 grades of Aroclor in making up a Hydraulic fluid and one of their customers for this Hydraulic fluid had sufferred an accident. A high pressure line had burst and the man concerned had received contamination in his eyes. Following hospital treatment, it was still giving him "gip", according to Mr. Hope, and we were asked to comment.

K.A. ORMAN.
