SURVEY
of

COMPLIANCE COSTS OF PROPOSED BENZENE REGULATIONS

Get whatever data
you can even if incomplete by June
+ send others
when you
can get them.

This survey is designed to provide timely and urgently needed information to the API General Counsel and to the Interdepartmental Committee on Occupational Safety and Health. Please return a copy of the survey to:

Steven M. Swanson
American Petroleum Institute
2101 L Street, N.W.
Washington, D.C. 20037

by June 15, 1977.

1. Please provide your estimate of present benzene concentration in motor gasolines.

Leaded _____ PER CENT

Unleaded _____ PER CENT

2. Do you think that it is possible to reduce the benzene content of gasoline?

Yes _____

No _____

3. If so, can you supply an estimate of the following:

- a. Percent benzene concentration which can be achieved in motor gasoline.

Unleaded _____ PER CENT

Leaded _____ PER CENT

- b. How long would it take to accomplish these reductions?

_____ years

- c. Do you have an estimate of how much benzene reduction would cost if its gasoline concentration is 1.5 per cent maximum (by volume).

\$ _____ PER GALLON

MCD 000000039

6. Are there other generic products included in your answer to question No. 5? If so, please list.
7. Please list all generic products which contain more than 1 per cent benzene.

Signed _____

Company _____

Date _____
