To Mr. J. F. Reeves

Reference

At Anniston

Subject

Westinghouse Electric Corporation
East Pittsburgh, Pennsylvania

Subject concern has complained that on a recent shipment of Aroclor 1254 to them, in tank car MONX 802, we forwarded from our Anniston laboratory the analytical data on the shipment, which, of course, is correct procedure, but failed to show on the data sheet their order number.

In the future, when the laboratory forwards Westinghouse the analytical data sheet, please be sure the sheet carries Westinghouse order number, so they can tie it in with the proper shipment.
