Subject: Re: GAO Report

Angelica,

Additional information for you:

We do not have that information and we recommend you reach out to DC Public Schools for more information regarding lead testing in DC schools. <https://dcps.dc.gov/page/water-testing-lead>.

EPA is aware of multiple schools, school districts, and states implementing a lead in drinking water testing program. Please contact the primacy agency in a specific state to obtain more information regarding lead testing in schools in their state.

Subject: GAO Report

Hi Angelica, we have your inquiry below. What's your firm deadline?

Hi Kyle,

I'm a producer with the CBS Evening News with Jeff Glor. We are working on a story about the GAO study on lead testing in schools. I'm reaching out because CBS News is trying to track down schools that are currently testing for lead. Could you steer me to schools that have tested positive and are in the process of removing and updating the school's filter systems, pipping system, etc? In that report, I read that DC schools are in the process of testing for lead under a new local law. Are there any schools in the DC area that I should reach out to?

If you have any questions, I can also hop on a call. Here's my contact number:

Ex. 6

Thanks for the help.

Best,

Angelica
