Mass.; Stewart-Warner Alamite Sales  
Locust Street, Hartford, Conn.; and  
Alamite Co., Inc., 622 Cherry St., Des  
Iowa. Oxy-Catalyst, Inc., Wayne,

## We've got a Winning Combination

**LESIE**  
MARK  
**DOUBLE SEATED  
DIAPHRAGM CONTROL VALVES**

With the New  
**LESIE**  
MARK  
**DOUBLE SEATED  
DIAPHRAGM CONTROL VALVES**

Getting a spade a spade you've got a "royal flush" of features  
These new Valves designed for use with control instruments.

"Flow-Line" Contoured Bodies have ISA standard face-to-face  
and high capacity, low turbulence and minimum body pressure  
characteristics.

Integral, top and bottom guided construction is self-aligning and non-  
regardless of unevenness of bolt tightening.

Integral, stainless steel seating surfaces are recommended for steam  
to reduce seat ring thread corrosion. Renewable, interchangeable  
also furnished where desired and may be easily replaced  
removing valve body from the line. Elaborate grinding at high  
surfaces is completely eliminated.

These Valves, you get as standard equipment, features heretofore only  
available in expensive, specially designed valves.

Look for LESIE REGULATORS under "Valves" or "Regulators" in your classified telephone  
directory in the following cities where LESIE factory trained engineers are located:

|               |               |                 |                  |                     |                |                 |                   |                 |                |                  |                       |                |                |               |                   |                  |
