

WHAT IS THE INDUSTRIAL HEALTH FOUNDATION?

IHF is a non-profit organization for the advancement of healthful working conditions. It serves as a medium for voluntary action by member companies, individually or collectively, and as a center to which they can turn for assistance with all health-related problems.

WHO CAN BELONG?

Membership is available to industrial organizations. Where companies have several locations, all plants share in the benefits of membership. Dues are scaled to the total number of employees. An association having an interest in occupational health and safety may affiliate through association membership, which entitles it to receive publications, consultation, and analytical services, and to attend symposia, training courses, and other meetings of the Foundation.

WHY SHOULD COMPANIES JOIN?

Membership in IHF will identify your company with a free-enterprise approach to worker health. Established in 1935, IHF has nearly 40 years experience in industrial health. Membership entitles your organization to full benefits of IHF services, including the availability of highly qualified industrial hygiene, medical, and safety personnel to supplement your staff on a consultant basis at cost.

Member companies receive special discounts on publications, reduced registration fees to all meetings and courses, and special rates on analytical services. In this way savings can actually exceed the cost of membership.

MEMBERSHIP SERVICES

- Engineering — plant visits and surveys to review the industrial hygiene and/or safety aspects of your facilities.
- Occupational Medicine — current review of occupational health programs in plant or corporate facilities.
- Analytical and Toxicology Laboratories — testing of environmental and biological samples by all methods; short- and long-term toxicity studies.
- Information and Education — literature searches and publications on specific subjects; frequent conferences and training courses on topics of current interest.
- Industrial Hygiene Digest — monthly publication containing occupational health and safety news and literature abstracts.

APPLICATION FOR MEMBERSHIP

JVS

This non-profit organization is an association of industries which has among its members many leading industrial establishments. It is a vehicle for voluntary or collective action by member companies. It is a source of assistance for all health related problems. In the past, we have received certain free privileges due to my acquaintance with Dr. Daniel Braun and several of his staff. I have been politely reminded that many advantages can be achieved only through membership in this organization.

Due to greatly increased need for laboratory work involving air samples and similar work, it will be advantageous for us to become a member of this group. Membership for Harbison-Walker, based on division population, is about \$700.00 annually.

Since their fees for such work include a sizeable discount, I recommend that we join this group. Many of our customers and several of our competitors have been members for years.
