TO : J. P. Mieure - T2F

In response to the reference memo and to confirm our discussion at the PCB Effluent Standards meeting held Friday, March 7, it was agreed that reports of animal feeding and residue studies made with Aroclor 1016, Aroclor 1242, Monochlorobiphenyl and MCS 1043 would be prepared for publication. The normal review procedure will be followed and every effort will be made to expedite publication.
