Georgia - Pacific wants the most current information on Asbestos as it pertains to O.S.H.A. Regulations. Please forward pertinent data to me for delivery to Georgia - Pacific.

A call on Georgia - Pacific's Technical Center in Tigard, Oregon, would be worthwhile if you come West.

R. C. Tomczak

RCTomczak/cmm

we have been working with G-P on dust sampling, regulations etc since late last year. I talked to Gene O'Neill earlier this month and met this week with their chief engineer from Portland (John Di Lorenzo) and their plant personnel at the Alton Plant. We gave them drawings of our packaging area, discussed their recent citations and fines, and reviewed OSHA & EPA regulations. Today (7/19) they picked up 130# of SG-200x (1/8" pellets) from our NF lab for evaluation.

(over)

one there was a can sample of ...
but is soon moving to Marietta I understand.
We have monitored dust at all their plants
except Acme (Quaker) and are scheduling
another test at Marietta. I would ^{be glad} ~~try~~ to
discuss the situation with their corporate
personnel (such as Ken Gibson, safety director) at
Portland, but I don't know of anything
specific which I can send you, which
they don't have. Let me know if there is
a specific problem or question.

John Myers
