Subject: Update of Epidemiology Study of Vinyl Chloride Workers

As you know, the Vinyl Chloride Panel of CMA has sponsored an up-date of the epidemiology study which was done about 10 years ago. That up-date is now complete and has been sent to USEPA and to all member companies of the VC Panel. Uniroyal, as a member, received one.

Attached for your review, and future use as needed, is a copy of the report dated October 17, 1986. The original of this report and copies of the first study are on file in the Industrial Toxicology area at Middlebury.
