Location: Wayne cc: Mr. C. F. Bien
From: D. L. Johnson Mr. R. C. Hylan
Location: Corporate Environmental Engineering Mr. A. Lindenauer
Wayne CEED Files*
Subject: WAYNE - ASBESTOS SURVEY NO. 4

Attached are the results of a survey taken in Room 014, Building 1 at the request of R. Judd. During the survey two persons were cleaning the room to remove any asbestos that might be present from previous Research projects. These men wore lab coats and dust masks. Wet sweeping and dusting and/or a vacuum cleaner were used. The total time surveyed was too short (less than four hours) to establish a TWA.

The following is a summary of the results:

Operator	Time	Short Term Fibers/cc
9/24 Lab Technician	54	0.026
9/24 Technical Specialist	52	0.000

Results were far below existing standards.
