BELLEVUE, WA 98005

RE: SMITH, DEANE
DOB: 10/19/1927 SEX: M
ACCT#: 72998
Exam Date: 2011-06-03
Exam Location: Bellevue
Patient Phone: 425/765-6363

ACCESSION: 2146490
MODALITY: XRAY
EXAMINATION: XRAY CHEST 2 VIEWS

CHEST RADIOGRAPH TWO VIEW

HISTORY: Cough

TECHNIQUE: PA and lateral at 2:58 p.m.

COMPARISON: 06/18/2003

FINDINGS:

There is opacification of the inferior third of the left hemithorax with parenchymal consolidation and small - moderate left pleural effusion. No other focal infiltrate is present. There is no pneumothorax or right pleural effusion. Heart size is normal. Aorta is calcified and mildly elongated. Pacemaker device is intact. Mild sparring is noted in the thoracic spine. There is a mild pectus excavatum deformity.

IMPRESSION:

1. Left basilar consolidation with small to moderate left pleural effusion. Recommend correlation for pneumonia.
2. Report phoned and faxed to the physician's office at 3:20 p.m., 06/03/2011.

Thank you for referring this patient to Washington Imaging Services
