Gentlemen:

This is in connection with your Delphinite #2527 brand of fireproof adhesive cement which has been tentatively approved for use by the Cork Insulation Co., Inc., New York, New York, for vapor sealing cork pipe insulation.

Information is requested as to what brand name you wish to assign to this brand of material as it is desired to have a different brand name apply to the cement for sealing cork pipe insulation so that material covered by Bureau of Ships Specification 82023(1X7), which may be in stock will not be used incorrectly for this purpose.

Ultimately it is the intention of the Bureau to develop a fireproof vapor seal to be applied at the place of manufacture of the cork pipe insulation, and any cooperation you may give to effect this end will be appreciated.

Respectfully,

A. R. Mac Guff
By direction of
Chief of Bureau
