

1 .OCF-507 was received into evidence.)

2 MR. SMITH: Again, on the Multitemp issue,  
3 Mr. Shannon and Mr. Pearson, May 9, 1969.

4 I have attempted to prepare the brief  
5 summary report you have requested on the product  
6 called Multitemp.

7 It is completely free of asbestos. If we  
8 were selling Multitemp today, we would have the only  
9 asbestos-free rigid high temperature product on the  
10 market.

11 As you know, it is our hope and plan to have  
12 an asbestos-free calcium silicate (Kaylo) product on  
13 the market in about a year.

14 The activities of Selikoff and the adverse  
15 public reaction to the use of insulating products  
16 containing asbestos and the presence of asbestos-free  
17 Kaylo and Multitemp in our product line would, without  
18 doubt, all contribute to OCF's regaining its rightful  
19 position of leadership in the high temperature  
20 insulation market.
