American Hard Rubber Co.
93 Worth Street
New York, N. Y.

Mr. W. J. Dubois

Gentlemen:

This will confirm your telephone call to the writer on March 29th requesting information as to the toxicity or non-toxicity of our "Bakelite" VG-1916.

It is a policy of the Bakelite Company not to make any further claims about their materials except those outlined in the Product Standards and/or the technical data sheets. The preceding affirm the chemical inertness of VG-1916 and indicate that it is used extensively for intravenous tubing. No extensive tests have been performed by us, however, as to the long range effects of VG-1916 on animal products packaged therein.

We hope the information supplied will be of assistance to you. If we can be of any additional service, please feel free to call upon us.

Very truly yours,

BAKELITE COMPANY
