SUBJECT ASBESTOS INSULATION
REMOVAL & DISPOSAL NOTIFICATION

REFERENCE

TO [REDACTED]

In your memo of 4/27/79 you requested we secure clearance for removal and disposal of 40 cubic yards per month of asbestos insulation. Before we secure such approval, I want to make sure that the volume requested will be enough.

In addition to the general maintenance work, I understand that there will be other projects which will also require removal of asbestos insulation. (i.e. AN columns replacement, AN crude tanks, Department 23 work, Ethylene turnaround). Please review these needs and let me know if the 40 cubic yds/month cover these projects or if an additional amount is needed.
