Dr. Ellis

May 29, 1945

Mr. Tod Becker

Physical Examinations
Dept. 246 and Phosphorus Groups

I have discussed with Dr. Ellis your note of May 19th, in regard to the physical examinations given hourly employes at Dept. 246 and the Phosphorus Group. He tells me that these men are given examinations in the dispensary at approximately monthly intervals. He checks the general appearance of the man, examines his teeth and gums, and takes his blood pressure.

Dr. Ellis explained that examinations are now given less often than they formerly were because of the good experience we have had in Dept. 246 and in the Phosphorus Group. If ever troubles do arise, examinations will be made much more frequently.

His findings other than the information included on the dispensary sheet are not reported. If anything unusual is noticed, further examination may be made and a written record drawn up for the man's file.

If this does not answer your questions, fire away again.
