subject PROPOSED FEDERAL STANDARD FOR JOINT COMPOUNDS & TAPE — date March 3, 1977

RE: Your Letter of 3-1-77

My feeling on asbestos remains the same; I want to continue to provide an asbestos Ready-Mix as long as possible. In the meantime, continue development on the asbestos free product we currently have available. I would support the government to require an asbestos free product on federal jobs. If this transpires, we do have a product we can furnish.

I am very anxious to finalize the asbestos free casein project. As soon as we can introduce our asbestos free casein, I plan a price increase on all bag goods from Chicago, casein and vinyl.
