

May 1, 1962

Mr. M. B. Tipton
Canadian Titanium Pigments, Ltd.
1401 McGill College Avenue
Montreal 2, CANADA

Dear Tip:

Confirming our telephone conversation of May first, there is enclosed herewith a draft of a letter to be sent to CTP by the Carter White Lead Company of Canada, designating CTP Carter's sole sales agents for basic silicate white lead, made by Carter and including the right to CTP to sell the same under the trademark "45X".

Following the initial paragraph the terms and conditions, under which CTP would act as Carter's sales agent, should be inserted. This arrangement would be entirely consistent with the existing agreement between Carter, Sherwin Williams and Canada Metal Company. Since National is the registered owner of the trademark "45X", in Canada, as soon as CTP concluded its arrangement with Carter, we would proceed to have CTP recorded in the Canadian Patent Office as a registered user of the trademark "45X".

Sincerely,

CFK:bac
