Dr. Robert A. Kehoe, M.D.
Professor Emeritus of Occupational
Medicine
University of Cincinnati
Kettering Laboratory
Eden and Bethesda Avenues
Cincinnati, Ohio 45219

Dear Dr. Kehoe:

In response to your hand written note about the full draft of the ACS report on air, please keep it for whatever use you wish to make of it (keeping in mind that it ought not to be regarded as a final draft, since the review procedure, both inside and outside the ACS, and the rewrite have not been completed).

In response to the main body of your letter, I should say that I am exceedingly grateful for it. I anticipate others, both on lead and a variety of other topics, and I would hope that they will be as informative. I would hope also that we can distill from them an objective report on how the situation truly stands in a number of areas that have been rendered several times as complex as they really are, which in most cases is complex enough to begin with.

You may recall the comic strip character, George Bungle, who was forever running through the basement in the dark and strangling himself on the clothes line. The sensation is not unfamiliar to me, and I confidently expect it to grow more so, or rather less so.

Thanks again for your comments.

Sincerely,

K. M. Reese
