ELLIOTT S. ROBINSON, M.D., PH.D.,
ASSISTANT DIRECTOR

ANTITOXIN AND VACCINE LABORATORY

December 23, 1924

Miss M. Ordway,
Department of Physiology,
School of Public Health,
Boston, Mass.

My dear Miss Ordway:

You were very kind to take so much trouble in getting the lead poisoning literature for me. I am quite sure that Doctor Hamilton's article and the references that you have given will supply my friend with the information he desires. I have asked him to send along any problems or questions that he may have, so I may take the liberty of troubling you further.

Sincerely yours,

Benjamin White
Director
