ASBESTOSIS: Your P.520. Investigation here reveals that it is most difficult to provide a concrete answer to your request for the names and industrial history of the four employees at present inmates of the Perth Chest Hospital.

We have records from Dr. J. McNulty's recent visit indicating those employees who would have to go south for hospitalisation but we have no medical records or opinions that they are specifically asbestosis cases.

In view of the above, we would ask you please to endeavour to nominate by name the four employees referred to and we will supply their industrial history.

Yours faithfully,

A. Marshall
