Subject: Emerson Input to the "PFAS under REACH" legal process
Attachments: 2022 1102 EU REACH Exemption Request - Emerson Electric.docx

Dear Ms. Ivarsson

Please find attached our latest input to support the "PFAS under REACH" legal process.

In our opinion, there are strong technical, scientific, socio-economic and regulatory reasons that would justify an exemption of these chemicals

- Fluoropolymers (including fluoroelastomers)
- Fluoroether lubricants (perfluoropolyethers – PFPE)
- Fluorocarbon refrigerants (F-gases)

from the PFAS REACH restriction when used in the monitoring and control equipment and equipment for HVACR.

We have summarized our rationale for this request, acknowledging that we intend to provide further details during the Public Consultation.

I trust that this information is helpful to the process and remain available for any further question!

With best regards,

Dina Köpke
