BULLETIN FIREPROOFING

7061-16-1

SUBJECT: Environmental Protection Agency

DATE: April 17, 1973

EXH. 141 DATE 6-26-86
WITNESS
Susan Cosmo
Court Reporter

On April 6, 1973, the EPA's "National Emissions Standards for Hazardous Air Pollutants" became effective with the publication of these regulations in the Federal Register. These regulations affect the continued use of MK3.

Effective 90 days from date of publication - July 4, 1973 - sprayed materials used to insulate or fireproof buildings, structures, pipes, and conduits will be limited to those materials which contain less than one percent asbestos on a dry-weight basis. Therefore, MK3 spray operations now in process or about to begin will be permitted, subject to a changeover to conforming materials by July 4, 1973.
