

1 beginning professor.

2 In 1974 I was invited to study in Wales in
3 the United Kingdom under a professor by the name of
4 Wagner, J.C. Wagner, and he is the individual who
5 actually discovered the association between asbestos
6 exposure and mesothelioma, cancer of the outer lining
7 of the lung, which I guess we will talk about.

8 Q Yes.

9 A So in 1974 I learned from him how you can
10 use animals as models to teach us about human
11 disease.

12 You can't do experiments on people, so we
13 have to develop animal models that tell us about the
14 disease process, and that is where I learned that
15 understanding.

16 Q And how long did you spend with Dr. Wagner
17 in that area?

18 A I was there for about eight weeks, through
19 most of a summer.

20 Q And as a result of your learning process of
21 the teaching models or, excuse me, the experimental
