University of Cincinnati  
College of Medicine  
Eden Avenue  
Cincinnati 19, Ohio

Dear Bob:

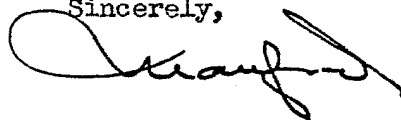

Thanking you for your letter of June 24th calls for some further identification, since no less than three most interesting opi of that date have come from you. This, then, is to acknowledge your remarks on the rather painful subject of EDTA "prophylaxis."

I will not here dwell on my own thoughts on this matter, nor on the impression left by a visit to the Riker lads in Los Angeles the week following our little huddle with Bill Shepard in San Francisco last June. Suffice it that my one purpose in calling attention to these promotional vaporings is in the interest of more decent and ethical industrial medicine and hygiene, with what may be said or done in any public way obviously up to like-minded members of the medical profession itself.

I was glad to see the copy of your letter to Tom, and even more so to learn from him, in a telephone conversation yesterday, that Foreman's manuscript is to be sent to you. I have asked for fifty reprints and understand that I am to have them.

Acknowledgment of Opi II and III in due course, as time permits.

Sincerely,

MB:MM
