NEW PERF-A-TAPE CEMENT

ALL-PURPOSE... READY-MIXED

Just open the container and you're ready for work. PERF-A-TAPE Ready-Mixed Cement slips better under knife or trowel. Bonds better. Sands easier. Finishes extra-smooth. It excels powder cement by far in resisting edge cracking, joint ridging and surface crusting. Use PERF-A-TAPE Cement for gypsum drywall joint finishing, plaster repairing, back-blocking, or as an adhesive in double wall construction using SHEETROCK® Wallboard. See your TEXOLITE® Paint dealer or write Dept. APD-92, 300 W. Adams St., Chicago 6, Illinois.
