Dr. C. W. Young,

Cleveland, Okla.

My dear Dr. Young:

I am very sorry indeed to be making another request of you, but I find it necessary to obtain fresh specimens of urine and faeces from your patient Mr. [REDACTED] an employee of the Johnson Oil Refining Company.

Very rarely do we lose any of the samples which we start to analyze, but during the analysis of this sample a small explosion in one of our chemical hoods destroyed a number of samples, including this one, and I am very anxious to obtain accurate information on your case.

May I ask you to please obtain other samples and to send them on to me at your earliest convenience, after which I will give you a full report of the results.

Very truly yours,

RAK:EJ
