COPY

Dear Doug & Henry:

In line with the annual physical examinations and x-rays required at the Toms River and St. Louis plant locations for our employees, we want to make available and in fact recommend that these physicals be taken by all employees including office personnel and yourself's because of the close proximity of office to plant and regardless of the infrequency of some of the people to plant exposure.

Accordingly, lets be sure that all personnel at both plants go for the physical and x-ray.

Should any of the office personnel decline, we want signed and on file a dated release indicating the physical examination was in fact offered but voluntarily declined by the employee. Please follow on this.

Cordially yours,

. . . . Julius
