GUESTS

R.W. Faulk - Shell Oil Company
A. Wesley Horton - University of Cincinnati

largest amount, $35,000. went to the Pennsylvania Department of Health, where Dr. Shilen, Director of the Division of Industrial Hygiene, has set up an occupational cancer control program with a physician and a nurse. At a later date, two engineers and a statistician will be assigned to the project. The attached forms (Appendix B) are being prepared in quantity for use in their surveys and are essentially identical with the form submitted to them by Dr. Hueper to insure uniform data from the various states participating in the industrial cancer program. The oil industries located in the Philadel[illegible] area are high on their agenda.

Dr. Hoag and Dr. Newquist spoke briefly concerning articles on cancer they have written for the Secony-Vacuum News and Texaco Topics respectively. It was agreed that other companies could well afford to follo their example.

T.M. FRANK
Secretary

McIVER WOODY
