

Terminated Study Final Report (GLP)

Study Title: PFOS and POAA Study in Goats

To comply with the requirements of FIFRA GLP Standards, 40 CFR 160.185(a), this final report is being issued for a terminated study.

Sponsor:

William Weppner, Ph.D.
3M EHSR 236-1B-10

Testing Facility:

William Reagen, Ph.D.
3M Environmental Lab 2-3E-09

This study was subject to the provisions of the GLP standards. This report does not include all requirements for a GLP report. If the study is submitted, an amended report will be issued to include all GLP requirements.

3M Environmental
Laboratory Study
Number:

FACT-TOX-100

LIMS Number: U3022

In Life Study
Number:

ABC 40304

Initiation Date: 19 May 1992

Reason(s) for Termination: The goals of this study are currently being addressed within a more comprehensive and controlled framework than existed when this study was conceived. Analytical methods and laboratory systems are vastly improved over those available in 1992.

Data Storage: All analytical study data is archived at 3M Environmental Laboratory.

QAU Statement: See the attached prepared and signed statement by the Quality Assurance Unit.

Kris Hansen
Study Director

William Reagen
