

Proceed Forward

Notes

the properties and assets of the Harlan Copper Works and the International Lead Refining Company were acquired by the International Smelting and Refining Company. The Smelting Company also assumed the liabilities of those companies existing as of that date.

Effective at the beginning of business January 1, 1935, the National Copper Works at Perth Amboy, N. J., the Lead Refinery at East Chicago, Indiana, and the Zinc Office Plants at East Chicago, Indiana, and Arcor, Ohio, commenced operations as plants of the International Smelting and Refining Company.

The operations of the International Smelting and Refining Corporation are now conducted by the following departments:

Smelting Department:	Windsor Plant
	Freeport Plant
Refining Department:	Marathon Copper Works
	East Chicago Plant
Zinc Oxide Department:	Edna Chicago Plant

Communications should be addressed to the Company, followed by the name of the plant or department, such as --

International Sealing and Retaining Company,
Raritan Copper Works,
Parrish, Albany, N.Y.

International Sewing and Milling Company,
Lend Milling Department,
East Chicago, Indiana.

International Gasating and Refilling Company,
Zinc Oxide Department,
Akron, Ohio

Will you please be governed accordingly.
