[PJM Files Two Alternate Proposals to Address State-Subsidized Resources in Capacity Markets](#)

By [Adrienne Thompson](#) & [Jasmine Hites](#) on April 17, 2018

POSTED IN [MARKET POLICY](#)

On April 9, 2018, PJM Interconnection, L.L.C. ("PJM") filed two alternative proposals to address supply-side state subsidies that, as PJM argues, could otherwise depress prices in PJM's capacity market, the Reliability Pricing Model ("RPM"). As presented by PJM, its "Capacity Repricing" proposal would establish a two-stage capacity market to accommodate subsidized resources, while the other proposal, the "MOPR-Ex proposal," would expand PJM's use of the Minimum Offer Price Rule ("MOPR") to address subsidized resource entry. With PJM's filing, the issue of how to address out-of-market capacity market subsidies returns again to FERC exactly one month after a divided Commission approved a similar filing from the ISO New England Inc. ("ISO-NE") (see March 20, 2018 edition of the [WER](#)).

FERC Approves Settlement with ETRACOM for Market Manipulation Allegations

By [Jamond Perry](#) & [Christopher Zentz](#) on April 17, 2018

POSTED IN [FERC ENFORCEMENT](#)

On April 10, 2018, FERC approved a Stipulation and Consent Agreement (“Settlement”) among the Office of Enforcement (“OE”), ETRACOM LLC (“ETRACOM”), and Michael Rosenberg (together, with ETRACOM, “Respondents”) as in the public interest. OE claimed that Respondents violated federal law and FERC’s rules against anti-manipulation in the California Independent System Operator Corp. (“CAISO”) wholesale electric market. FERC determined that the Settlement was fair and reasonable and resolved all outstanding claims and proceedings between OE and the Respondents.

FERC Approves MISO Interconnection Revisions Regarding Modifications to NRIS Designations

By [Meghan Mandel](#) & [Thomas DeVita](#) on April 17, 2018

POSTED IN [GENERATION](#), [TRANSMISSION](#)

On April 10, 2018, FERC approved the Midcontinent Independent System Operator, Inc.’s (“MISO”) proposed revisions to Attachment X of its Open Access Transmission, Energy and Operating Reserve Markets Tariff (“Tariff”). Specifically, MISO proposed to require interconnection customers seeking to modify their elected level of Network Resource Interconnection Service (“NRIS”), to do so earlier on in the generator interconnection process.
