In the Twenty-Fivers CLUB

with the aid of US Shells

These men broke the full course at Skeet. Like a large proportion of the other members of this select group, they use Climax and Defiance Loads.

Another "Twenty-Fiver" who swears by US shells—H. Ehlenberg of the Cecil Park Gun Club, Tuckahoe, N. Y.

George W. Hills, Wildwood Grove Gun Club, Pinebrook, N. J., broke the full course at Skeet with US shells.

A REAL test of men and guns and ammunition, Skeet calls for more than ordinary performance.

Leaders at this sport have learned to bank on US shells. The eight men pictured on this page have broken their "25" with US Climax and Defiance loads. And many other "Twenty-Fivers" also used these dependable shells when they broke their perfect scores.

At Skeet, at the traps, in the field . . . the Climax and the Defiance have established an enviable reputation for all-around reliability. Everywhere . . . you find the better shots using them. Both are good shells . . . *mighty good* shells.

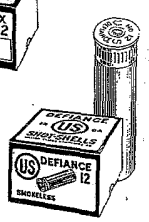

Left to right—Edwin A. Dygert, Chas. W. Keller, Hugh A. McCaffrey and O. E. James of the Izaak Walton League Skeet Club, Omaha, Nebr. They won their memberships in the Twenty-Fivers Club shooting US shells.

CLIMAX—A stalwart, medium-priced shell for all-around use. Bulk or dense smokeless powder. All gauges including .410 . . . and as reliable as an old hunting dog.

Hugh Foster and L. D. Fletcher, Malvern (Iowa) Gun Club . . . both US users and "Twenty-Fivers." Shooting Climax, the former won Iowa State Championship at Skeet, breaking 48 x 50. Geo. Redinbaugh of same club was runner-up with 44 x 50 . . . Climax.

DEFIANCE—A high-grade, smokeless shell at a low price. 12, 16 and 20 gauges . . . loads for Skeet, trap and field use. The shell they're all shooting.

Heavy Loads for High-Flyers

The US Line also includes two groups of powerful long-range loads for downing high-flying ducks and geese . . . loads that give added yards of effectiveness to your gun. (1) *Ajax Heavies*—the last word in progressive-powder loads. "Packed with the power of the thunderbolt" . . . and effective at unbelievable distances. 12, 16, 20 gauges. (2) *Climax Heavies*—Loads of power at a moderate cost. At their price, it is difficult to find another long-range shell of equal speed, reach and killing power. Progressive-burning powder. 10, 12, 16, 20 and .410 gauges.
