Mr. Donald A. Olson
Director of Sales
Functional Fluids Group
Monsanto Company
800 N. Lindbergh Blvd.
St. Louis, Missouri 63166

Dear Mr. Olson;

Thank you for your letter of February 9, 1970 alerting us to the potential problem of environmental contamination from Polychlorinated Biphenyls. We are currently looking into the use of products containing these Polychlorinated Biphenyls in our system and will take appropriate action where necessary. We will be looking forward, with interest, results of your testing of new formulations to replace the Aroclor 1254 and 1260 components in your Pydraul products.

I would also like to thank you for the Chemical Week article attached to your letter. This article is of general interest to various personnel in our Company.

Very truly yours,

W. J. Cahill, Jr.
Vice President
